

## **FAQs: Conduit Tubing, Steel Conduit**

1. [What happened to TT 1, the standard for tapered tubular structures? Is there a replacement standard?](#)

**What happened to TT 1, the standard for tapered tubular structures? Is there a replacement standard?** "TT 1 was rescinded in the late 1980's, and no NEMA section currently works on tapered tubular structures. ASTM does have a relevant standard: A595-98, Standard Specification for Steel Tubes, Low-Carbon, Tapered for Structural Use. Their website is [www.astm.org](http://www.astm.org)."
