

ENERGY EFFICIENCY AND ELECTRIFICATION IN THE BUILT ENVIRONMENT EXPO

10:00 AM - 2:00 PM
WEDNESDAY, JUNE 26

RAYBURN FOYER
RAYBURN HOUSE OFFICE BUILDING

Light refreshments will be provided

In recognition of High-Performance Building Week, NEMA is hosting the Future of Energy Efficiency and Electrification in the Built Environment Expo. The event will provide an opportunity to explore the latest innovative technologies and products from leading manufacturers that are helping transform the built environment.

- Find out how NEMA companies are creating products that are helping create smart, energy efficient, and resilient homes and offices across the country.
- Discover efficient motors, energy storage, building automation systems, advanced lighting, vehicle-to-buildings technology and other innovative products.
- Learn about products that helping lower consumers' energy bills and build the smart, connected buildings of the future.

Speakers to be announced

In Support of High-Performance Buildings Week and the Congressional High-Performance Buildings Caucus
